Course Syllabus
SPRING 2017

BIOLOGY 205-H02: FOUNDATIONS OF BIOLOGY:
ECOLOGY AND EVOLUTION – HONORS

INSTRUCTOR: Dr. Caroline DeVan
EMAIL: caroline.m.devan@njit.edu

OFFICE: 340F Central King Bldg.
OFFICE HOURS: T & R: 1:00PM - 2:00PM & W: 10:00AM - 11:30AM

COURSE MEETINGS: W & F: 8:30AM–10:25AM
COURSE LOCATION: CKB 315
COURSE WEBSITE: http://moodle.njit.edu

COURSE DESCRIPTION: Ecology and evolutionary biology are fundamental to our understanding how life on earth functions. This course focuses on understanding the major principles in these fields and on how ecology and evolution affect all life on earth. In addition, this course aims to help students think critically, making connections between different concepts and drawing conclusions from scientific data.

COURSE OBJECTIVES:

Students are able to:

1. Design an experiment and use statistics to test whether there is a significant different between two treatment groups.
2. Explain how biological variation is produced and maintained.
3. Explain the mechanisms that lead to evolution within a population and the formation of new species.
4. Analyze a phylogenetic tree, and explain how organisms are related to each other based on this tree.
5. Describe the basic series of events that occurred during the evolutionary history of life.
6. Explain and predict how a population will change in size over time.
7. Assess the importance of a given species interaction and hypothesize why it may have evolved.
8. Describe how energy flows through a community and explain how species influence community structure.
9. Predict how changes to biogeochemical processes may change ecosystems.
10. Describe how humans affect biodiversity and why biodiversity is important.
11. Outline how the environment affects species and species distribution.
12. Justify why the study of ecology and evolution is important to people.
13. Read and summarize scientific literature and make connections between multiple scientific articles.
14. Work successfully within a group by breaking complex tasks into parts, planning and managing time, delegating responsibilities, and effectively communicating.

**REQUIRED MATERIALS:**

**GRADING POLICY & SCALE:** Grades will be determined by performance on exams, in-class assignments, online homework, and a case study group project. There will be two in-class exams, worth 80 points each. There will be a cumulative final exam worth 110 points. In-class assignments and homework will be worth a total of 100 points, and the case study group project will be worth 130 points.

<table>
<thead>
<tr>
<th>Assignments</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>In-Class Exams (80 points each)</td>
<td>160</td>
</tr>
<tr>
<td>Final Exam</td>
<td>110</td>
</tr>
<tr>
<td>Case Study Group Project</td>
<td>130</td>
</tr>
<tr>
<td>In-class assignments and homework</td>
<td>100</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>500 points</strong></td>
</tr>
</tbody>
</table>

**CASE-STUDY GROUP PROJECT:** During this course you will become familiar with case studies. Once per week we will go through a case study as an entire class. The case study project is something you will work on throughout the semester and includes assignments that will be completed as individuals, and as a group. Thorough instructions and guidelines for the project can be found on Moodle, deadlines are in that document as well as listed on the tentative course schedule in this syllabus.

**WEEKLY ONLINE ASSIGNMENT:** Each week you will complete an online assignment about the assigned reading. This online assignment will be due on Sunday night by 11:59 PM. These assignments will be part of your in-class assignments/homework grade.

**MAKE UP EXAMS:** Make up exams will be possible only with a doctor’s or a dean’s letter or with prior approval. If you have a serious reason for missing an exam, you must talk to me BEFORE the scheduled exam period to notify me that you cannot take the exam. You are then responsible for arranging with me to make up the test within two days.

**ACADEMIC INTEGRITY:** The University’s academic integrity policy can be found [here](https://). This code will be enforced in this course. If you have any questions about this policy, please come and talk to me about it.

**MOODLE:** We will be using Moodle for our class website ([https://moodle.njit.edu](https://moodle.njit.edu)).
## TENTATIVE SCHEDULE OF TOPICS

<table>
<thead>
<tr>
<th>WEEK</th>
<th>TOPIC COVERED</th>
<th>READING / ASSIGNMENTS DUE</th>
</tr>
</thead>
<tbody>
<tr>
<td>18-Jan</td>
<td>Course Overview &amp; Pretest</td>
<td>Syllabus</td>
</tr>
<tr>
<td>20-Jan</td>
<td>Scientific Method &amp; Statistics</td>
<td>Sections 1.1 – 1.3 Statistics Primer (Moodle)</td>
</tr>
<tr>
<td>25-Jan</td>
<td>Origin of Variation &amp; Population Genetics</td>
<td>Section 21.1, 21.2 Genetics Primer (Moodle)</td>
</tr>
<tr>
<td>27-Jan</td>
<td>Hardy-Weinberg Equilibrium</td>
<td>Section 21.3</td>
</tr>
<tr>
<td>1-Feb</td>
<td>Natural Selection &amp; Sexual Selection</td>
<td>Section 21.4 &amp; 45.7</td>
</tr>
<tr>
<td>3-Feb</td>
<td>Sexual Selection, Coevolution</td>
<td>Section 45.7</td>
</tr>
<tr>
<td>8-Feb</td>
<td>Genetic Drift, Gene Flow, Mutation, and Inbreeding Depression</td>
<td>Section 21.5 &amp; 21.6 CS: Topic selection is due by midnight on 2/10 for your case study project</td>
</tr>
<tr>
<td>10-Feb</td>
<td>Behavior &amp; Altruism</td>
<td>Sections 45.1, 45.2 &amp; 45.6</td>
</tr>
<tr>
<td>15-Feb</td>
<td>EXAM 1</td>
