

BIOLOGY 383-002: NEURAL BASIS OF BEHAVIOR

INSTRUCTORS:	Dr. Gal Haspel	PHONE:	973-596-8198
OFFICE:	Central King Building 420B	EMAIL:	gal.haspel@njit.edu
OFFICE HOURS:	R: 4:00 - 5:00pm & By Appointment	COURSE SCHEDULE:	M,W: 11:30AM – 12:50PM [CKB 207]

COURSE DESCRIPTION: How does the brain control behavior? To answer this rather broad question, we will explore how scientists study and understand behavior and in turn develop hypotheses, predictions and experiments that reveal the neural mechanisms for specific behaviors. We will review and discuss several "model animal systems" in which scientists have had remarkable success in understanding the interplay between neural mechanisms and behavior. Each subject will be covered in two or three lectures. Usually there will be a short quiz at the beginning of the last lecture of each subject. Between subjects (usually over the weekend), students will submit "tweets" that will summarize another student's presentation, a concept of one of the lectures or the whole subject. The course will conclude with presentations of selected topic by groups of up to three students.

COURSE PREREQUISITES: BIOL 201/202 or R120:201/202 and BIOL 205/206 or R120: 205/206.

OPTIONAL TEXTBOOK:

Neuroethology of Predation & Escape (first edition) by KT Sillar, LD Picton, and WJ Heitler

ISBN: 9780470972243

Copyright Year: 2016

Publisher: John Wiley & Sons, Incorporated

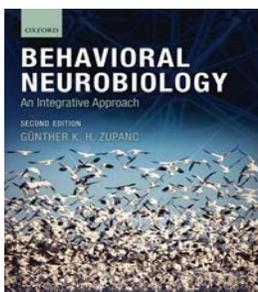

The course is not following the book chapters. It will clarify or add to the discussion in class if you read the relevant chapters (see table).

FURTHER READING:

Behavioral Neurobiology: An Integrative Approach (2nd edition) by GKH Zupanc

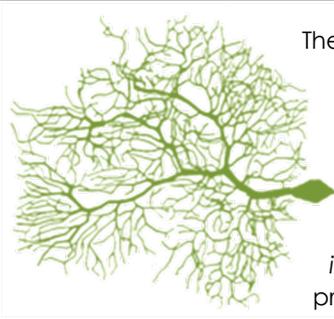

ISBN-13: 978-0199208302 ISBN-10: 0199208301

The course is not following the book chapters. It will clarify or add to the discussion in class if you read the relevant chapters (see table).

BIOLOGY 383-002: NEURAL BASIS OF BEHAVIOR

LEARNING EXPECTATIONS AND ASSESSMENT: This course is a curiosity-based exploration of the relationships between neural mechanisms and behavior. It does not try to teach specific skills or information that are critical for any specific subsequent career or course – rather, its goal is to satisfy students' inherent curiosity about animal behavior and the neural systems that underlie it.

The course has two primary teaching goals. The first goal is to expose students to some of the best examples of the neuroethological approach to the study of the mechanisms of behavior. This will be assessed using exams in which students will be asked to explain scientific and biological strategies, conceptual organization, and detailed features of these examples.

The second teaching goal is to provide students with the tools to explore their own interests in the behavioral neurosciences. The students, in teams of two or three, and professor will agree on a topic of each student's choosing that will allow them to explore their own interests related to the course. The last few lectures are dedicated to student presentations. Each team of students will present a 20 min talk about their topic. Honor students (and optional for others) will also submit a term paper summarizing their selected topic. Non-honors students are also encouraged to write a paper but a formal paper will not be required. The grade of non-honor students will be averaged with one of the other grade components. Even if these students do not write a paper, they will be required to meet with the professors to discuss readings of their choosing. Improving presentation and writing skills are objectives of the course and students are advised to begin working on a paper and a presentation early. Professional support on writing can also be provided by the NJIT writing center: <http://humanities.njit.edu/writingcenter/>

Instructions for first written assignment

- No longer than a page, single space, 12 points Arial or Times NR.
- Choose an interesting story of animal behavior (from scientific or popular science sources), some options will be suggested.
- Follow directions to find primary and related literature.
- Analyze and present the main paper: Paper Author/Title, Big Question, Background observation, Hypothesis, Approach, Predictions (we will discuss and practice generating hypotheses and predictions in class), Results.

Instructions for second (topic) paper

- Choose a topic, find literature and discuss with professor. Submit a first version three weeks after midterm exam, I will return with comments and track changes (know how to use it) and will grade the final version (due by review for final exam).
- Three to four pages, single space, 12 points Ariel or Times NR.
- Begin and end with the big picture, tell the specific story in the middle: Introduce the story, why is it interesting, what is the BIG question
 - The specific study: what was the original observation? What is the hypothesis (is there more than one? Is there an explicit hypothesis?)? What were the experiments and predictions? What were the results? Here you need to choose the central and important result and not detail all the controls.
 - Summarize or conclude: what did we learn from this study? How does it connect to the big picture in the introduction?
- Do not copy-paste (from the cited literature or from other sources).
- List your sources in a sources list at the end. Use a format similar to that used by your source. Because it will be based on a few sources, there is no need to cite in-text

BIOLOGY 383-002: NEURAL BASIS OF BEHAVIOR

GRADING POLICY & SCALE:

ASSIGNMENT	PERCENTAGE
Quizzes and Canvas tasks. For example, pseudo-tweets (A short message of max 140 characters, including spaces, submitted at the end of each subject #likethisexample #120char) and suggested exam questions.	15%
Midterm Exam	20%
Presentation / Paper / Discussion	30%
Final Exam	35%
TOTAL	100%

GRADING SCALE			
A	90-100	C	70-74
B+	85-89	D	60-69
B	80-84	F	0-59
C+	75-79		

CLASS POLICIES:

- ❑ **Cell Phones and social media:** Please leave the classroom if an emergency phone call or update of social media is required. The use of cell phones during quiz or exam times is prohibited and will be considered a violation of academic integrity.
- ❑ **Makeup Exam Policy:** There will be no makeup exams, except in rare situations where the student has a legitimate reason for missing an exam, including illness, death in the family, accident, requirement to appear in court, etc. The student must notify the Biological Sciences office and the Instructor that they will miss an exam. In all cases, the student must present proof for missing the exam TO THE DEAN OF STUDENTS OFFICE, e.g., a doctor's note, police report, or court notice, etc., clearly stating the date and times.
- ❑ **Academic Integrity:** Students are reminded of the Honor Code each one has agreed to abide by (at Rutgers or NJIT). Violations of Academic Integrity will be dealt with according to the guidelines indicated in the NJIT Academic Honor Code (<https://www.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>). Please re-read Article III of the Honor Code (page 4), which describes conducts that are considered unacceptable (cheating, violating the US Copyright law, etc.). Rutgers has similar rules (<http://www.ncas.rutgers.edu/oas/ai>). Turnitin will scan all submitted material for plagiarism.
- ❑ **Bonus Information:** How to email your professor: <https://medium.com/@lportwoodstacer/how-to-email-your-professor-without-being-annoying-af-cf64ae0e4087>

BIOLOGY 383-002: NEURAL BASIS OF BEHAVIOR

COURSE OUTLINE:

Dates	Topics	Text	Notes
R Jan 24	Introduction		
M Jan 27	Skills: the scientific method	Z:Ch. 2	
R Jan 30	Review of neurophysiology and analysis of behavior (Bioactive)		NSF
M Feb 3	Motor control: reflexes, oscillators		
R Feb 6	Motor control: CPG, locomotion		
M Feb 10	Motor control: locomotion	Dickinson 2000, Grillner 2003	
R Feb 13	Sensory modalities: lateral line		
M Feb 17	Sensory modalities: Hearing and Echolocation	Z:Ch. 5	
R Feb 20	Sensory modalities: vision		
M Feb 24	Startle and escape response: introduction and C-startle in fish	Z:Ch. 6	
R Feb 27	Startle and escape response: squid cockroach fly		
M Mar 2	Sensory processing: barn owl	Z:Ch. 7	
R Mar 5	Sensory processing: Toad		
M Mar 9	Skills: Presentation		
R Mar 12	Midterm exam	Z:Ch. 8	
Mar 16, 19	Spring break – March 15-22 – University Closed		
M Mar 23	Sensorimotor: Sensorimotor: electric fish electric fish		Dr. Fortune
R Mar 26	Navigation and migration	Z:Ch. 11	
M Mar 30	Navigation and migration		
R Apr 2	Communication and song: cricket and others	Z:Ch. 12	
M Apr 6	Communication and song: songbirds		
R Apr 9	Neuromodulation and hormones	Z:Ch.9	
M Apr 13	Learning and memory	Z:Ch. 13	
R Apr 16	Clocks and rhythms: sleep		
M Apr 20	Student presentations	Z:Ch. 10	
R Apr 23	Student presentations		
M Apr 27	Student presentations		
R Apr 30	Student presentations		
M May 4	Review for exam		
Final Exam
